

Mustafa AVCI
Genel Müdür

Güneş Motor Supapları has been manufacturing exhaust and inlet valves for all kinds of gasoline and diesel engines since 1972.

The company has been in a plant which has been constructed in 8.000 square meter closed area in 20.000 Square meter open area with 5.000.000 quantity of annual capacity since 2012

Operations plans which are essential for production are prepared by programming software and designing on computers in the Manufacturing-Planning Department in the company. Martensitic and austenitic

high-alloyed, special engine valve steel conforming to the DIN 17480 are used in production. Raw materials are supplied by European well-known steel manufacturers and the raw materials are accepted and put in the ware house by subject to quality control when they reach at the company

The production of the accepted raw materials has been done with special machines controlled by CNC and PLC.

In order to achieve and provide the aimed product quality, product characteristics are strictly controlled according to related quality control plans, in all stages of production. The quality of finished products is controlled by testing machines.

such as Optic Testing Machine, Hardening Testing Machine, Profile Projector Machine, Ultrasonic Crack Control Machine, Surface Roughness Machine etc. in the final Quality Control Laboratory equipped with highly precise inspection and testing equipments. Products undergone preventive lubrication and packing are ready for the shipment.

The quality of our products was certificated by Turkish Standard Institute Conformity Certificate (TSE) in 1995 and engine valves which we produce include TSE marking. Quality Management System was firstly certificated as ISO9002- by TUV NORD in 1999 and then it was changed to ISO 9001:2008 Quality Management System in December 2009.

Güneş Motor Supapları supplies requested inlet and exhaust engine valves to about 50 countries such as America, Germany, Russia, England, China, Egypt, South Africa etc. as well as domestic market.

Our market contains % 60 domestic market and % 40 foreign market. Güneş Motor Supapları adopts quality from the raw material to production, from production to sales until the support after sale as a living philosophy

Güneş Motor Supapları, which uses % 13 of its annual turnover for technology and human resources, has been continuing its investments evermore.

The management mentality at GUNES SUPAP is that we will be able to compete within all process from the raw material to the product in the international market through Professional criteria by innovating continually

When you join Gunes family, you can find all kinds of features which must be at a successful company that experiences changes, are different from others, become the leaders in domestic market within its sector and enlarge in foreign markets.

Your satisfactions is
our promise...
